Supporting students on the autism spectrum

Free one day workshop for parents and carers

School staff are currently undertaking a professional learning course using the Positive Partnerships resources. This unique opportunity for parents will ensure staff, parents and the wider community gain the same understanding, knowledge and skills to improve the outcomes for students with autism and their families.

This workshop intends to:

- Increase understanding of the impact of autism on learning
- Introduce a planning tool that can be used to share an understanding of your child
- Explore ways to work in partnership with your school
- Provide an opportunity to network and share strategies with other parents/carers

The content and resources in this workshop have been developed by Positive Partnerships. The Positive Partnerships initiative is funded by the Australian Government Department of Education and Training through the Helping Children with Autism package.
